Year 5

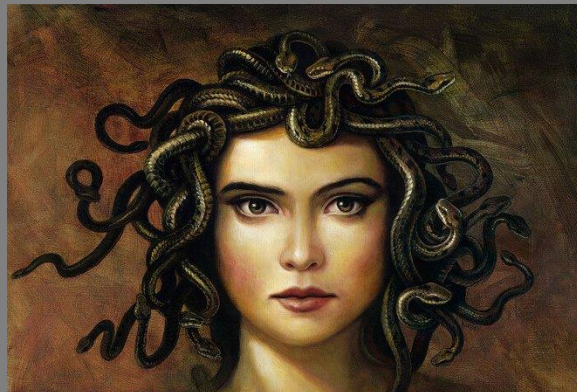

Jessica A - Ospreys

This week you have worked with precision and skills to write a poem about an Ancient Greek mythological creature – in your case Medusa.

Your poem included many types of figurative language, including similes, metaphors, alliteration, personification, hyperbole and even onomatopoeia. It wasn't just that you included them that was impressive but that you included them for a purpose!

Well done Jessica.

Woodpeckers – Georgia

In Year 5 this week in maths, we have been learning about mixed numbers and improper fractions, Georgia was able to work on problems involving these, and she completed more challenging work showing her understanding and grasp of these concepts. Super work Georgia, well done!

Convert $\frac{20}{3}$ to a mixed number

Divide the numerator by the denominator

$$20 \div 3 = 6 \text{ plus } 2 \text{ remainder}$$
$$\frac{20}{3} = 6\frac{2}{3}$$

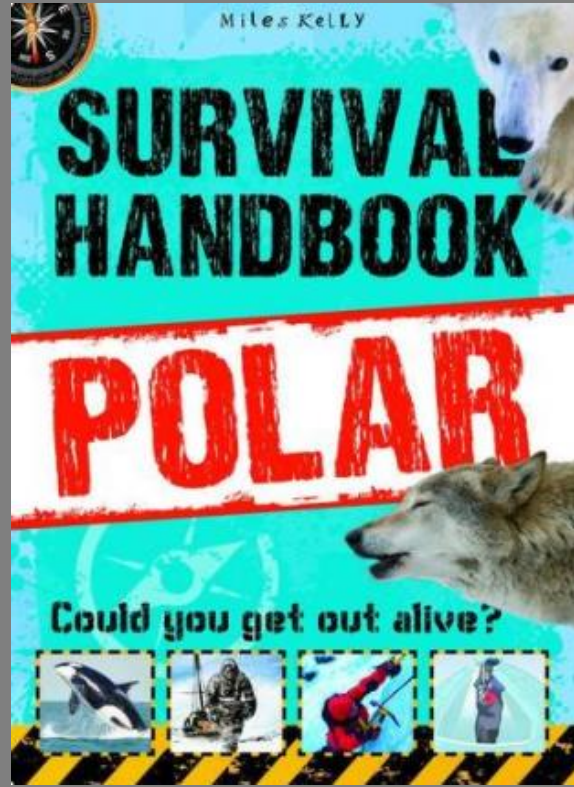

6 becomes the whole number
2 is the numerator of the fraction as shown
3 is the denominator

The diagram shows a blue rounded square containing the mixed number $1\frac{1}{2}$ on the left. A rainbow arrow points to the right, where another blue rounded square contains the improper fraction $\frac{3}{2}$. Below the first square is the text "mixed number" and below the second is "improper fraction".

On Sunday **6th February 2022**, Her Majesty The Queen will become the first British Monarch in history to celebrate a Platinum Jubilee after 70 years of service. It will be seven decades that have passed since she came to the throne at the age of 25 following the death of her father, George VI.

- At Feniscowles, we are initially going to get involved in the celebrations by planting a tree to commemorate The Queen's 70 years of service.
- Next Thursday morning, we will need one person to represent their class and help plant our commemorative tree.

Later in the year, when the weather improves, we will continue our celebrations.
